

# Fulfil our promise to you.

Customised consultancy. New perceptions, tailor-made solutions –  
for innovative window and façade systems

**Window and Facade Systems**  
**Industrial Solutions**

---

Welcome to  
new perspectives.

**Sophisticated solutions for unique building envelopes.**

Whether it is stylish panoramic windows or spectacular lamella facades: Windows and facades form fascinating building envelopes and give houses their unmistakeable face. The demands placed on the design, functionality and flexibility of these elements are constantly increasing. The goal of achieving optimum energy utilisation, increased security and maximum comfort is the reason behind these increasing demands. As a result of this, nowadays windows and facade systems with increasingly customised solutions for sound insulation, sealing and heat insulation are in demand, and not simply "off-the peg" products. This is where we come into play.

**Customised consultancy.**

tremco illbruck Industrial Solutions is your strategic contact partner for complex window and facade construction projects at home and abroad. We will give you personal and professional advice and support in every project phase – from the analysis of individual tasks, to the development of tailor-made insulation solutions, the technical preparation and production of the finished product through to training sessions and application tips for the market launch. We give you new perspectives and develop tailor-made solutions. Get to know us!

*Around 200 key accounts from different industrial segments value our advice and benefit from our solutions.*

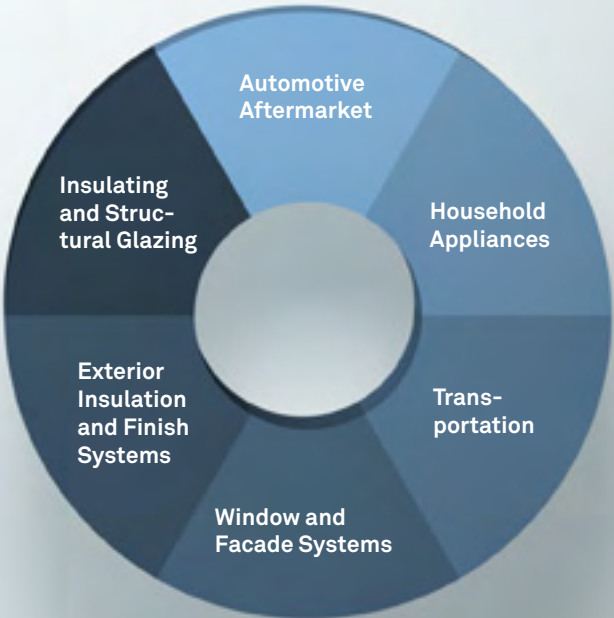

**Business Unit Industrial Solutions:  
Sparring partner for the industry**

The Business Unit Industrial Solutions at tremco illbruck is a specialist for complex challenges from the industry, a dynamic expert team and a forward-looking solution partner. We develop and implement tailor-made, future-oriented solutions for bonding, sealing and insulation. Our goal is to optimise the complex production processes of international customers. What sets us apart: We never provide standard responses, instead we deliver unique solutions that are perfectly adapted to your requirements. We draw on our entire range of industry-specific options and an extensive product portfolio in proven tremco illbruck quality. As a customer, you benefit from quick reaction times, short development and delivery times, improved profitability and efficiency.

**Our path to your goal:**

- **Agile**  
Fixed contact partners in the expert teams, made up of key account managers, technical service and customer service enable quick reaction times.
- **Experienced**  
Comprehensive knowledge of the market and in the development of successful product solutions thanks to 20 years of project experience.
- **Partnership**  
The close collaboration with our customers enables customised consultation and implementation. We use our technical expertise to support you during product development and also during new product launches and certifications.

**KEY CUSTOMER SEGMENTS**

# Universal connector.

tremco illbruck – the specialist in high-performance sealing and bonding solutions for over 60 years

tremco illbruck is synonymous with robust connections and reliable sealing of components. Sounds easy enough, but the details are anything but. To make sure everything runs smoothly and without complication for our customers, 1,100 employees at 29 locations across Europe, Africa and Asia work on individual solutions for process-optimised production flows.

Having more than 60 years of experience on the market certainly makes many things easier, but no project is ever just routine; each project is unique and developed for the benefit of our customers. Our annual net turnover in excess of EUR 300 million is testament to the trust that our business partners have in us, making tremco illbruck one of the world's leading specialists in the bonding and sealing of construction components.

## Invisible helpers: Next-generation adhesives.

As a leader of innovation in the industry, tremco illbruck is constantly investing in the research and development of intelligent, environmentally friendly materials and insulating materials. This is also the case for bonding connections and sealants in the construction and window industry.

We want to make our contribution to ensuring that the huge potential in bonding technology is used to an even greater extent in the future. In technology centres all over Europe, we pool our know-how and our research expertise for the manufacture of high-quality, cost-effective and pioneering products.

### Innovations with a system

- We create innovative product solutions in our four European technology centres
- In-house production facilities guarantee continuous availability and customer-specific research into new materials, connections and future-oriented solutions
- The direct exchange of information between the customer, researchers and developers during the process enables tailor-made improvements and innovations

# Your partner with profile: tailor-made solutions for perfectly insulated windows and facades.

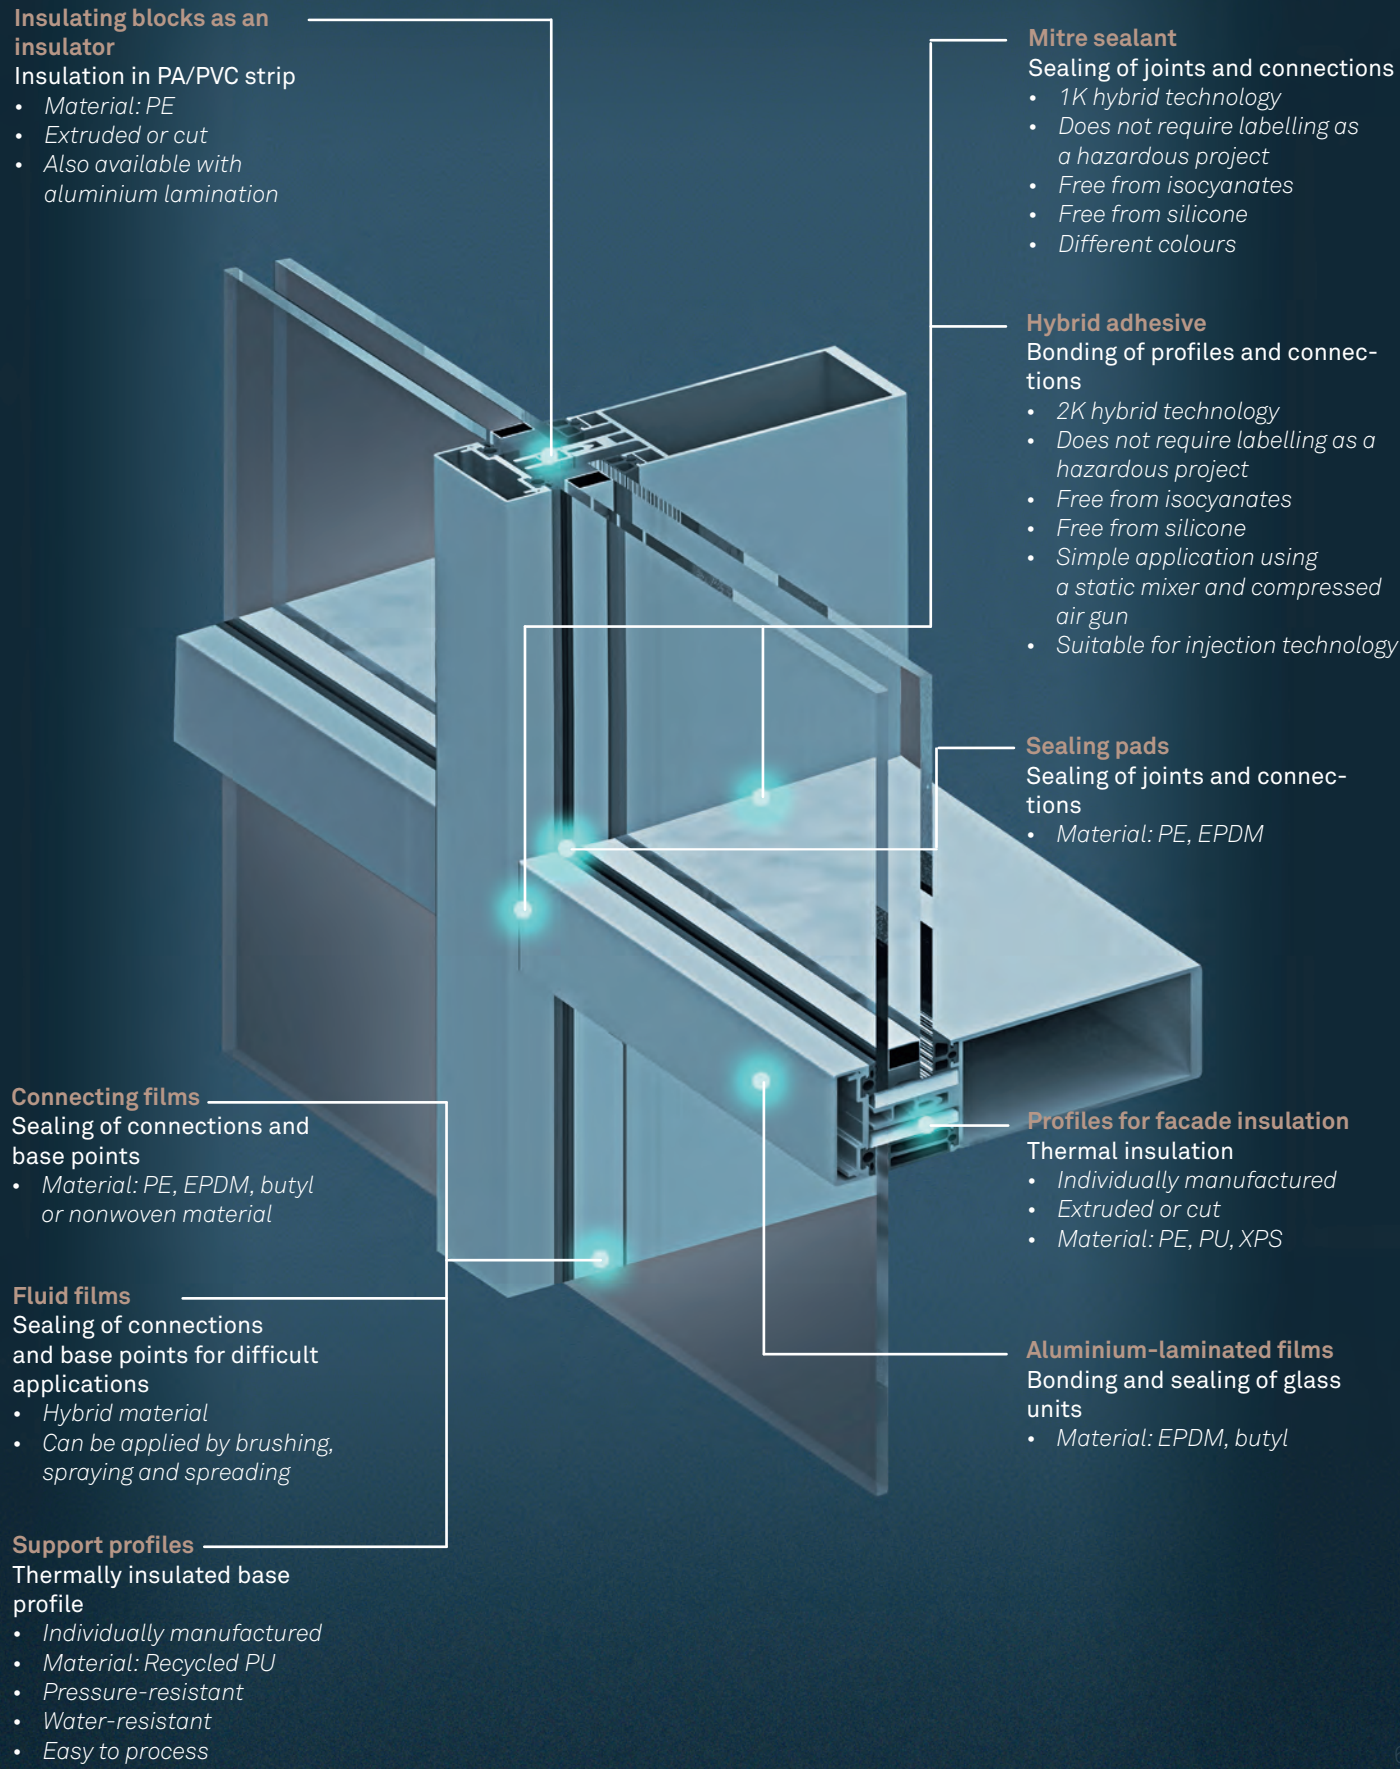

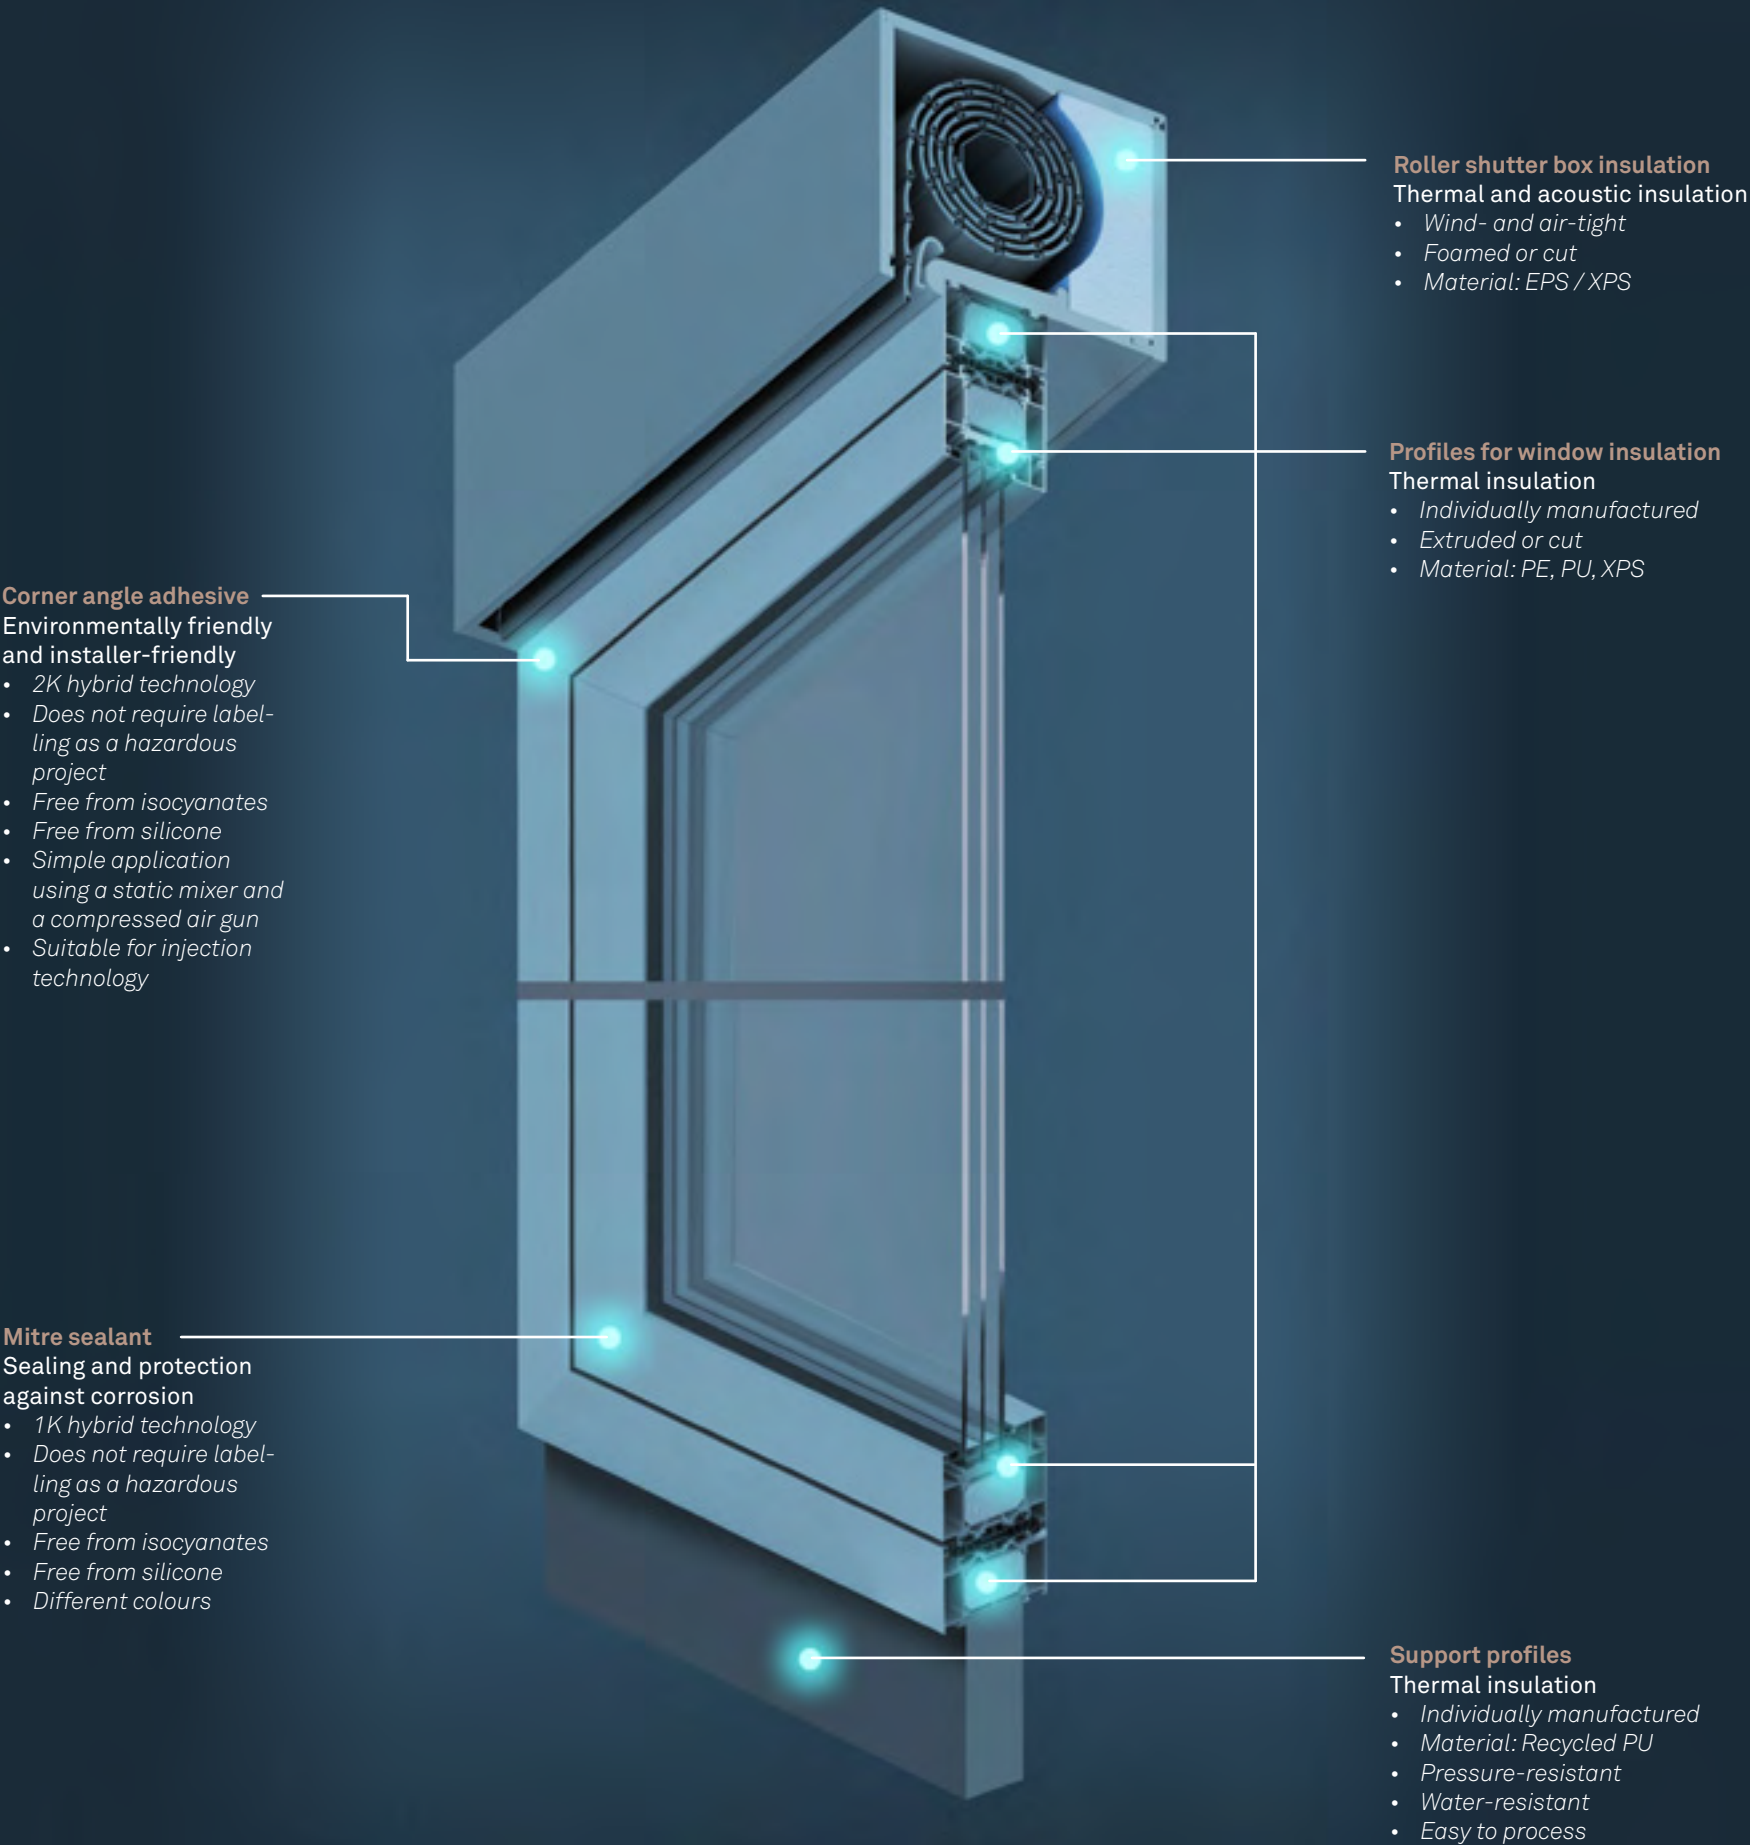

No two projects are the same. Developing customised products for sealing and bonding is one of our core areas of expertise at tremco illbruck – for example:

- Insulation of cavities in window and facade profiles
- Sealing of windows and facades
- Insulation of roller shutter boxes

We primarily offer the following product solutions:

- Individual profiles and moulded parts for insulation and sealing in frames
- Profiles for glazing rebate insulation
- Hybrid sealants for mitre sealing
- Hybrid adhesives for bonding at corner angles
- Insulation for roller shutter boxes
- Corner seals for windows and facades
- Support profiles
- Fire protection foams
- Films
- Impregnated and non-impregnated sealing strips

Our products are made from a range of materials, including PU, PE, EPDM, EPS, cellular rubber or hard foam boards.

# For a perfect result.

Project support through to series production.

tremco illbruck is one of Europe's leading manufacturers of high-performance sealing and bonding products. Sealing tapes, membranes, adhesives and sealants with particular properties form the core of our extensive range.

The Business Unit Industrial Solutions specialises in finding individual solutions for specific requirements from industrial customers and in optimising their production processes.
